
32L Hydroponic Dutch Bucket For Sale

Dutch Bucket planting system with self diligent water change. It works by bringing water, nutrients and air to the roots of the plants through the flow of water or nutrient solution to achieve rapid plant growth. Dutch bucket is not only suitable for hydroponic planting, but also for aerosol cultivation, with the advantages of water saving, energy saving and high yield. It is suitable for growing tomatoes, green peppers, cucumbers and eggplants.

The Dutch buckets are individual containers typically made of plastic. Each bucket has a capacity of 32 liters (approximately 8.5 gallons) and features a reservoir at the bottom to hold the nutrient solution.

Size: **350*350*350(L,W,H)**

Material: **PP & UV**

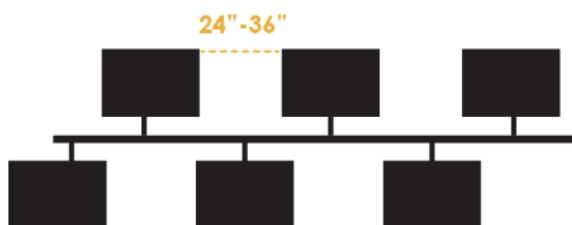

Volume: **32L**

Weight: **1.15kg**

1. Tomatoes

Growth Time: 4 – 6 months

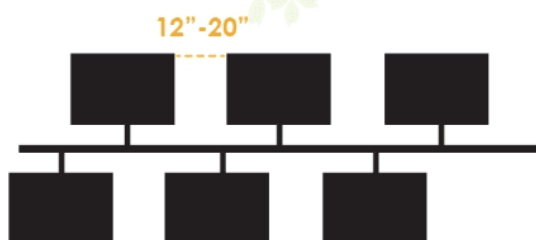

Space Requirements: 24 – 36 in. between buckets

2. Peppers

Growth Time: 6 – 12 months

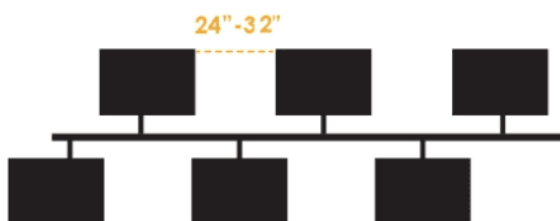

Space Requirements: 12 – 20 in. between buckets

3. Cucumbers

Growth Time: 3 – 5 months

Space Requirements: 24 – 32 in. between buckets
